

Getting Started with AWS Projects

khushinewgrad@gmail.com

Why AWS?

I am learning AWS because it is one of the leading cloud platforms that provides a wide range of tools and services essential for modern data-driven applications, web hosting, and automation projects.

I am challenging myself to complete 10 projects in 20 days.

You might be wondering... what's AWS?

AWS is a platform for services to store files, run applications, analyse data and do much more.

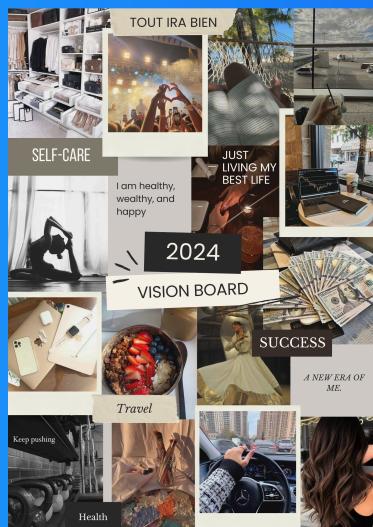

How I'll reach my goals

I'll make learning fun and rewarding by treating myself with bobo tea every week after completing a minimum of 2 projects per week!

I'll make time for doing projects by allocating in one hour every 2 or 3 days in a week specifically to this!

To rest and recharge, I will facetime my partner or my parents who are currently living hundereds of miles away ☺

Excited to share my progress! Let's connect.

To learn with other AWS students and get support, I'm joining the NextWork community.
